AFA INDUSTRIES™ Heavy Duty Engine Parts

Product Bulletin

AFA CATERPILLAR® HAND PRIMER PUMP

AFA Industries is pleased to announce the availability of a new Hand Primer Pump that fits over 800 Caterpillar® engine/vehicle applications. This new pump is in addition to our complete offering of high quality, durable engine parts for Caterpillar engines.

Fuel priming pumps remove air from fuel systems prior to starting engines. A faulty hand priming pump can allow air into the system and cause starting problems or fuel delivery problems.

AFA Part No. 1052508 is in stock and available. This priming pump is also known as the "short" priming pump (6.1"/154.94mm high). This pump comes packaged with the mounting gasket included.

Also available are In-Frame and Complete Overhaul Engine Kits, Valve Train parts, Water and Oil pumps, Cooling System Components, Fuel System Components, and other engine parts to help you repair most components for most Caterpillar® engines. Contact your local sales representative or AFA Certified Distributor for more information.

Total System Engineering - In 1987, AFA Industries started manufacturing OE and Aftermarket sealing products. Since then we have expanded into a global engine parts manufacturer with an extensive system of quality control and inspection that is second to none in the industry. Our technology is always state of the art. Materials used in our parts are always OE quality or better. Our manufacturing methods are constantly monitored for consistency and efficiency. The results are products that will meet or exceed the expected life cycle of any heavy duty diesel engine in any application - guaranteed.
