USAGE INSTRUCTIONS

DRAWER REMOVAL

Pull the drawer out so that it is almost fully extended. On the RIGHT-hand side, push the black release lever DOWN. On the LEFT-hand side, pull the black release lever UP. While holding the levers as instructed, pull the drawer forward until released from the slides attached to the Tool Chest (“Tool Chest Slides”).

Note: The slides attached to the drawer (“Drawer Slides”) are an integral part of the drawer and must be removed along with the drawer itself.

DRAWER REPLACEMENT

To replace the drawer, pull the slides out completely. Insert the brackets on each side of the Drawer Slides into the corresponding slots on the Tool Chest Slides, making sure they are properly positioned. Once the brackets are inserted into the slots, completely close the drawer to set all slides in their proper positions.

SHELF ADJUSTMENT

Ensure all products have been removed from the shelf.

To adjust the shelf height position, tap the underside of the shelf, starting on the right side. Disengage the shelf from the front and back cabinet tabs first from the right side and then from the left.

Tilt the shelf diagonally to move it to the desired position. Once at the desired height, secure the shelf by pushing down on all 4 corners until the shelf engages fully with the tabs.
