

Magellan Maestro 4350

The new Maestro 4350 is gaining rave reviews for its OneTouch feature and navigation features. Viewed as an icon on the 4.3-inch touch screen display, OneTouch makes it quick and easy to create shortcuts on a dedicated screen to favorite destinations and points of interest. Before driving, the display shows an overview of a calculated route along with possible alternate routes. Click on a button and the 4350 displays the estimated time of travel and distance for three different possible routes. For entertainment, OneTouch lets users set a shortcut to the 4350's music player for instant launching. Other features include hands-free calling with Bluetooth-compatible cell phones, FM transmission to hear directions via the car stereo, and sending/receiving text messages. The unit comes with a traffic receiver and three months of traffic service. After that time, the service costs \$60 for an annual subscription. \$400. Magellan: 800/707-9971; magellangps.com.

Triton 400 Adventure Pack

The Triton series of GPS handhelds initially turned heads due to a new touchscreen user interface flow and screen graphics, making it easy to operate by both experienced and novice users. Now Magellan offers an AdventurePack that includes National Geographic TOPO! Explorer Deluxe map software to accompany five Triton models, including the 400. The software offers topographic maps on two DVDs, and 25 map credits for downloading. There's also access to National Geographic's online database of trails, Forest Service roads and other recreational info. The 6.6-ounce waterproof Triton 400 has a 2.2-inch screen and offers 10 hours of battery life from two AA batteries (included). \$250. Magellan: 800/707-9971; magellangps.com.
