## **IMMEDIATE RELEASE**

### **Strike releases Wireless Charging Pads**

BRISBANE, Jan. 28, 2016 – Over the last two decades, the use of mobile devices has grown rapidly across the world. More and more people rely on their devices for communication, GPS navigation, news updates, social media and internet browsing.

Consequently, this increase in usage creates a problem whereby phone batteries deplete charge very quickly. Mobile charging is a common problem for almost all smartphone users. Using a standard charger with wires and cords is not only inconvenient, but clutters work spaces.

Strike Group, globally known as the leader in hands-free tech products, recently launched its line of Wireless Charging Pads. These stylish wireless chargers can be used with any smartphone with Qi capabilities like the LG G4, Samsung Galaxy S6, Samsung S6 Edge to name a few. Hence, the charging pads can be treated as a universal charger for all Wireless Charging enabled phones.

Strike's Wireless Charging Pads have two variants, Furniture Embedded and Portable. Both devices allow users to easily charge their phones by just placing it on top of the device. These pads have built-in LED light displays, which acts as a charging indicator.

The Strike Portable Wireless Charging Pad has a sleek and slim design, perfect for users who are always on the go. The Strike Furniture Wireless Charging Pad is equally as sophisticated but requires integration with an existing office or home furniture such as desks or countertops.

Charge your device in style with Strike's Wireless Charging Pads. For more info, visit: <http://www.strike.com.au/products/Wireless-Charging-Pads>

Pricing starts at AU\$89.00 including GST.
