## Navigation Features

Features available on Standard & Premium Navigation Packages

### Enhanced Junction View

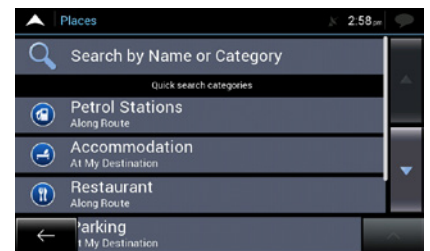

An impressive feature of the NextGen Navigation platform is the Enhanced Junction View which provides the driver with a realistic image of the upcoming intersection. This makes it a lot easier to navigate through intersections and exits you're unfamiliar with.

### Safety Cameras, School Zones & Lane Assist

For added safety, you can choose to receive audio and/or visual warnings of Speed Limits and upcoming School Zones & Safety Cameras.

The Lane Assist feature shows you in advance which lane(s) to be in, helping you avoid last-minute, potentially dangerous manoeuvres.

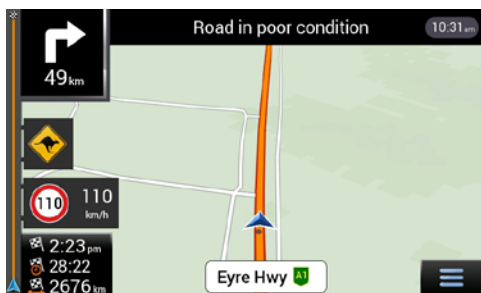

### "Points of Interest" Database

You now have access to the extensive "Points of Interest" (POI) database. Making it easy to find Petrol Stations, Emergency Services, ATMs, Restaurants and more.

You can search in a specific town or suburb, around your current location, along your route or close to your destination.

## Premium Navigation Features

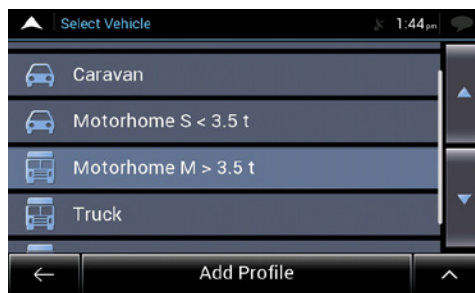

Features only available on Premium Navigation Packages

### Advanced Road Signs\*

Even while you are travelling unassisted by route guidance, the navigation will take into consideration the road ahead of you and give warnings of possible hazards.

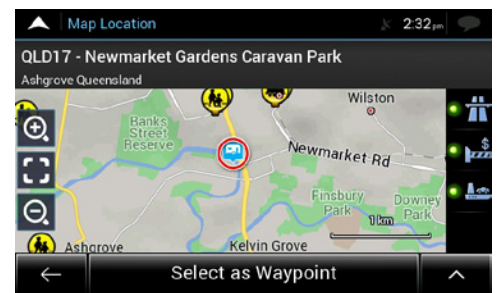

The advanced warning system notifies you of upcoming potential hazards such as Merging, Slippery Roads, Wildlife Crossing areas, etc.

### Trucks/Motorhome/Caravan Navigation\*

You can enter the specifications of your vehicle. Enter details like: Maximum Speed, Fuel Consumption in Cities and on Motorways, Engine Type, Length, Width, Height, Trailer and Weight.

You can also enter the Freight you are carrying (e.g. Bio-hazard, Explosive, Dangerous When Wet, etc.) and even disable U-turns on all roads!

### Camps Australia Wide POI Database\*

The Camps Australia Wide Points of Interest database includes over 3,900 low cost or free Camps Sites, Dump Points and Rest Areas.

Search by Number, Name, Location or even along your current route. Thanks to the contact information being installed on your device, you can also easily call your destination with the simple press of a button.
