Wire Cutters

Rize Tensioning Tool

CODE	DESCRIPTION
030340	Rize Wire Cutters

CODE	DESCRIPTION
RTTI	<p>As in all aspects of construction there may be times when you need to put a little more tension on the cable than is possible with just your hands. Therefore, Rize has available a tensioning tool for these applications. Made of steel and meant to last, the tensioning tool takes all sizes of Kwik-Locs and up to 3/16 inch cable. As with all Rize products the tensioning tool is guaranteed against initial quality defects. Natural wear and tear on the tool is eventually going to happen. Rize therefore keeps ample stocks of replacement parts available when needed.</p> <ul style="list-style-type: none"> • The tensioning tool is designed to apply tension of up to 600 lbs on cable that is terminated by a Kwik-Loc. • The tensioning tool works by holding the Kwik-Loc body and pulling the cable through the Kwik-Loc using the cam and anvil. • The powerful lever action will tension and retension the cable in seconds. • The tensioning tool can be used on all sizes of Kwik-Locs.
