

## STRIKE B2 7dBi ANTENNA

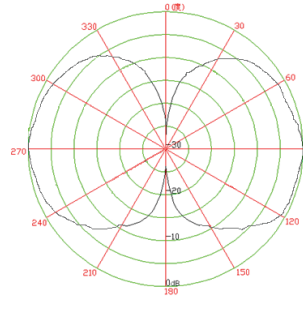

The antenna's high gain and reliable performance over **700/850/900/1800/1900/2100/2600MHz** frequencies makes it ideal for rural areas. This antenna has a removable whip and comes fitted with an FME connector and a bull bar mounting bracket which makes the installation quick and easy. The removable whip allows for seamless removal and re-attachment as the user desires. **Specifically designed to work with Strike Alpha Cradles.**
