ECLYPSE™ Connected System Controller

Overview
The ECLYPSE Connected System Controller (ECY-CSC) is a modular and scalable platform used to control a wide range of HVAC applications. It supports multi-protocol communications, including BACnet/IP, and is a listed BACnet Building Controller (B-BC).

The ECY-CSC consists of a control, automation and connectivity server, power supply, and I/O extension modules.

This programmable controller provides advanced functionality, such as customizable control logic, Web-based design and visualization interface (ENVYSION embedded), logging, alarming, and scheduling.

Applications
The ECY-CSC is typically used as:

- A controller for medium/large sized Air Handling Units (AHU), central plant, lighting, power monitoring, and other applications.
- Small building server and equipment controller with embedded ENVYSION. For example, it can be used to control and serve a boiler room.

Features & Benefits

Connectivity
The different types of connections supported by the ECY-CSC are as follows:

- **IP wired connection**
  Internal switch with two Ethernet ports allows the controllers to be wired in a star or daisy-chain topology. With a daisy-chain topology:
  - Fewer wire runs to a centralized switch are required, thereby achieving installation and cost reduction.
  - A laptop can be connected to the second Ethernet port for direct programming, configuration, and commissioning using EC-gfxProgram or ENVYSION.

- **IP wireless (Wi-Fi) connection**
  - **Wi-Fi Client -** Connection to the building’s existing Wi-Fi network or to another controller’s Wi-Fi Hotspot or Access Point.
  - **Wi-Fi Access Point -** extending the building’s wired IP network to your Wi-Fi Client devices.
Wi-Fi Hotspot - your own wireless area network, for wireless communication between the controllers, or with a mobile device or laptop for configuration, commissioning and servicing.

Both IP wired and wireless (Wi-Fi) connection
The availability of both Ethernet ports and USB ports for the Wi-Fi Adapter, allows for simultaneous wired IP and Wi-Fi communication on the same controller, which means you can choose and combine these connection methods. For example, Wi-Fi can be used between two controllers to jump a large atrium.

Connect from anywhere
Control technicians, facility managers, occupants, and others can easily connect to the system, on-site or off-site, using the different available tools:
- ENVYSION to create and view the graphical interface
- EC-gfx Program to create custom control sequences
- myDC Control to view, edit, and configure system operating parameters

IP Communication
- Increased speed and improved handling of numerous trend logs that enable applications, such as advanced analytics that require a large amount of data.
- Experience faster response and save time when programming, configuring, creating and viewing graphics, and upgrading your system.
- Control technicians can connect the ECLYPSE Wi-Fi Adapter to the ECY-CSC thereby creating a Wi-Fi Hotspot network. The control technician can then connect wirelessly to the system using a mobile device or laptop, for faster, easier system configuration, programming, commissioning, and servicing.
- Hostname management allows the controller to be addressed by a nickname to facilitate network management.

Open to Web Services
With the RESTful API, the ECY-CSC’s data can be accessed from different applications, such as energy dashboards, analytics tools, and mobile applications. The RESTful API documentation explains the implementation protocol for this interface.

HTML5 Visual Interface
The ECY-CSC comes embedded with both ENVYSION Studio and Viewer, and xpressENVYSION.

ENVYSION – Web-based graphic design and visualization interface
ENVYSION is a web-based graphic design and visualization interface used to create and deliver interactive graphical user interfaces and an optimal user experience for building owners and facility managers to better manage facility data.

Programmability
Supports Distech Controls’ EC-gfx Program, which makes Building Automation System (BAS) programming effortless, by allowing you to visually assemble building blocks to create a custom control sequence for any HVAC, lighting, or building automation application.

Batch EC-gfx Program Projects and Firmware Download
EC-gfx Program projects can be downloaded in batch to multiple controllers, for greater time savings. Batch firmware update can also be performed on multiple controllers.

Simplified Network Commissioning
The XpressNetwork Utility saves you time and expense by giving you increased control over multiple ECLYPSE controllers through device discovery and batch operations such as configuring, programming, and updating multiple ECLYPSE controllers on the network.
In addition, with the embedded step by step Commissioning Wizard, all configuration operations can be setup and applied in one go.

Increase productivity using the xpressNetwork Companion mobile app, making it easier to identify and locate a controller on the network. Use the QR Code marked on ECLYPSE controllers to easily collect key controller data and to facilitate its network integration with xpressNetwork Utility.

Scalable and Modular

The ECY-CSC is sized to cost-effectively meet the requirements of any HVAC application from small to medium to large systems. The most capable Connected System Controller model can be expanded to support up to 20 input/output (I/O) modules (up to 320 I/Os) while being able to adapt to new requirements as the need arises.

A connecting cable is used to connect successive rows of modules within a controls’ cabinet to provide power and communication.

ECY-RS485 communication module

An ECY-RS485 communication module adds two extra RS-485 trunks to support more BACnet MS/TP and Modbus RTU devices.

ECY-MBUS communication module

An ECY-MBUS communication module has one M-Bus port for meter integration, thus eliminating the need for a third-party gateway (from M-Bus to BACnet/IP).

BACnet/IP Device

The ECY-CSC is BTL-listed as a BACnet Building Controller (B-BC) and is certified WSP B-BC (Europe) and AMEV AS-A & AS-B (German-speaking countries). It supports BACnet/IP for faster communication in comparison to the traditional twisted pair communication bus.

Multi-Protocol Support

The ECY-CSC supports a range of communication protocols such as BACnet MS/TP, Modbus RTU, and Modbus TCP.

BACnet MS/TP and Modbus RTU communications are made by connecting directly to separate RS-485 ports. The ECY-CSC integrates up to three RS-485 ports when equipped with one ECY-RS485 extension module allowing the controller to support more than one trunk or communication protocol at a time.

Integrate full MS/TP trunks into a supervisory system like the EC-Net™ Supervisor, without the need for other hardware components such as an external BACnet MS/TP to IP router.

Modbus RTU and TCP

Modbus RTU and TCP communication can be used to integrate a wide variety of Modbus devices such as power and water meters, Variable Frequency Drives, air flow sensors, and more, without the need for additional hardware such as a gateway.

FIPS 140-2 Level 1 Compliant

FIPS 140-2 Level 1 compliance provides an enhanced level of security to protect data the controller is collecting and sharing making it suitable for use in the most sensitive environments.

Weather Forecast

The weather forecast is directly available from the internet to be shown on a connected ECx-Display or to be used by the controller’s code.

Smart Room Control Support

The Smart Room Control solution is an end-to-end system for the control of HVAC equipment, lighting, and shades/sunblinds, achieving the highest levels of comfort for occupants while cutting costs from installation time and wiring/material requirements to energy consumption. This solution combines:

- Lighting and shade/sunblind expansion modules to control lights (on/off or dimming) and shades/sunblinds (up/down and angle rotation).
- Multi-sensor combining motion and luminosity (Lux) sensors and an Infrared receiver that works with a convenient remote control.
- The ECLYPSE platform is compatible with Distech Controls line of Bluetooth® low energy technology enabled devices (Allure UNITOUCH™ and EC-Multi-Sensor-BLE) and mobile application providing state-of-the-art occupant management.
- Allure™ Series Communicating room sensors for increased occupant comfort settings using integrated sensors for temperature, humidity, CO₂, and motion.
**Allure™ Series Communicating Sensor Support**

These controllers work with a wide range of sensors, such as the Allure Series Communicating Sensors that are designed to provide intelligent sensing and control devices for increased user experience and energy efficiency.

- Allure EC-Smart-Vue
- Allure EC-Smart-Comfort
- Allure EC-Smart-Air
- Allure UNITOUCH

**Mobility**

The controller can be remotely accessed to program, configure, or maintain the installation thus reducing costs associated with on-site visits. Through a mobile device or PC, a range of tasks can be performed using the following free-to-use tools and interfaces:

- ENVYSION web-based graphic design and visualization interface
- EC-gfx Program graphical programming interface
- myDC Control mobile application

**Hand/Off/Auto Switches and Potentiometers**

The front assembly of Hand/Off/Auto (HOA) equipped I/O models allow users to override the control outputs for commissioning and maintenance purposes.

Universal outputs have potentiometers providing manual analog signal and output control to override voltage or current signal.

**High-Efficiency Design**

The power supply uses the latest high-efficiency switch-mode circuitry to make more power available to operate additional modules and for cooler operation.

---

**Hot-Swappable Tool-Less Design and Unique Latching Mechanism**

The I/O modules are hot-swappable for replacement without interrupting power and communications to other modules.

The front assembly of I/O modules separate from the wiring base by pushing the two latches up to unlock a module’s front assembly and then opening and pulling the hinged gull-wing covers. The latch design locks the front assembly to the wiring base.

The hinged gull-wing design protects and cover the stacked dual row I/O terminal strips.

**Ease of Installation**

The ECY-CSC modules are plug & play devices. They are equipped with HD-15 connectors that transmits power and communications to the next module for fast and easy assembly.

**I/O Status LEDs**

The status LEDs on the I/O modules allows the user to confirm the status of the inputs/outputs and facilitate commissioning and troubleshooting.

**Auto-Addressing**

The auto-addressing feature eliminates the need to manually assign an address to each I/O module therefore reducing installation and configuration time.

**Digital Inputs Up to 120Hz**

The ECY-16DI module supports pulsed signals up to 120Hz for equipment status monitoring and alarm point monitoring, commonly used in energy metering applications.
Color-Coded, Rising Cage Terminals

Terminal blocks are uniquely identified and color-coded for clarity and to prevent wiring mistakes. The rising cage clamp terminal block connectors offer a more robust and secure wire connection, designed to withstand activity and vibrations.

Robust Protection

The I/O modules are protected against mis-wiring and faults to prevent damage caused by incorrect wiring or other mishaps.

The power supply module contains over-voltage and over-current output protection to protect the electronics in unstable power supply conditions and against mis-wiring.

Alarms, Trend Log, Schedule Support

Embedded alarms, trend log and schedule support allows for fully distributed data and logic providing a more robust system. Embedded trend logs simplify system troubleshooting when compared to a centralized system.

Email Notifications Service

Technicians & facility managers can receive automatic email notifications for system status and alarms to ensure faster system servicing and response time. Email notification text can be customized to provide pertinent information about the issue at hand.
Model Selection

The ECLYPSE Connected System Controller consists of a power supply, a control, automation and connectivity server, I/O extension modules, and communication modules to create a controller tailored to its application. The different models for each are shown in the tables below.

Power Supply

A power supply module must be added after each HD15 cable (see Accessories below).

1. Upgrade and enable the functionality of your ECLYPSE controller’s RS-485 ports with our capacity-based upgrade to ECYS1000-48MS.
2. Up to 50 BACnet MS/TP devices recommended on each RS-485 port.
3. Up to 32 Modbus RTU devices recommended on each RS-485 port. The maximum amount of Modbus TCP devices is limited to available system resources (too many devices can affect system performance).
4. The ECY-S1000 models support a maximum of 320 points OR up to a maximum of 20 I/O modules.

## Accessories

| ECLYPSE HD15 Cable       | 6ft (1.8m) cable for Connected System Controller multiple-row panel installations. An HD15 cable must always be followed by a power supply module. For more information, refer to the Hardware Installation Guide. |
| ECLYPSE Wi-Fi Adapter    | Wi-Fi Adapter for ECLYPSE Connected Controllers. |
Product Specifications
Power Supply (ECY-PS24)

Power Supply Input
Voltage Range 24VAC/DC; ±15%; Class 2
Power Consumption 60VA
Frequency Range 50 to 60Hz
Overcurrent Protection Field replaceable fuse
Fuse Type 4A, fast-acting, 5 × 20mm (GMA-4A)

Power Supply Output
DC Voltage 18VDC regulated
Rated Current Range 0 to 1.6A
Rated Power 30W

1. The total power consumption of all modules connected to the right of this power supply, and up to the next connected power supply, including any connected loads, must be less than this value. A separate transformer rated at 60VA minimum and 100VA maximum must be used for each ECY-PS24 power supply for it to operate at full capacity.

Hardware
Power Distribution Direction Powered modules are connected to the right
Backplane Bus Pass-through connection for data and control signals
Status Indicator Green LED: power status

Mechanical
Dimensions (H × W × D) 4.74 × 2.85 × 2.31" (120.31 × 72.38 × 58.56mm)
Shipping weight 0.75lbs (0.34kg)
Mounting DIN rail or screw mounting
Enclosure Material FR/ABS
Enclosure Rating Plastic housing, UL94-V0 flammability rating
Plenum rating per UL1995

1. All materials and manufacturing processes comply with the RoHS directive and are marked according to the Waste Electrical and Electronic Equipment (WEEE) directive.
Environmental

- Operating Temperature: 32 to 122°F (0 to 50°C)
- Storage Temperature: -22 to 158°F (-30 to 70°C)
- Relative Humidity: 0 to 90% non-condensing
- Ingress Protection Rating: IP20
- Nema Rating: 1

Standards and Regulations

- CE:
  - Immunity: EN61000-6-1: 2007; Generic standards for residential, commercial and light-industrial environments

- FCC: This device complies with FCC rules part 15, subpart B, class B
- UL Listed (CDN & US): UL916 Energy management equipment

Power Supply (ECY-PS100-240)

Power Supply Input

- Voltage Range: 100 to 240 VAC Universal; +10%/-15%
- Input Current: 400mA typical
- Frequency Range: 50 to 60Hz
- Standby Power consumption: <0.5W
- Overcurrent Protection: Field replaceable fuse
- Fuse Type: 2.5A, Fast-acting, high-breaking, 250VAC, 5 x 20mm (TF2.5AH250V, IEC60127-2)

Power Supply Output

- DC Voltage: 18VDC regulated
- Rated Current Range: 0 to 2A
- Rated Power: 40W

1. The total power consumption of all modules connected to the right of this power supply, and up to the next connected power supply, including any connected loads, must be less than this value.

Hardware

- Power Distribution Direction: Powered modules are connected to the right
- Backplane Bus: Pass-through connection for data and control signals
- Status Indicator: Green LED: power status
Mechanical

Dimensions (H × W × D)  4.74 × 4.08 × 2.31” (120.31 × 103.65 × 58.56mm)

Shipping weight  0.71lbs (0.32kg)

Mounting  DIN rail or screw mounting

Refer to Hardware Installation Guide for more information

Enclosure Material  FR/ABS

Enclosure Rating  Plastic housing, UL94-5VB flammability rating

1. All materials and manufacturing processes comply with the RoHS directive and are marked according to the Waste Electrical and Electronic Equipment (WEEE) directive

Environmental

Operating Temperature  32 to 122°F (0 to 50°C)

Storage Temperature  -22 to 158°F (-30 to 70°C)

Relative Humidity  0 to 90% non-condensing

Altitude  <6562ft (2000m)

Pollution Degree  2

Ingress Protection Rating  IP20

(must be mounted in a protective enclosure to conform with electrical installation standards)

Overvoltage  Category II - 2.5 kV

Electrical Protection  DC output is Separated Extra-Low Voltage (SELV); SELV is implemented through reinforced insulation

Standards and Regulations

CE:

☐ Electrical Safety  EN 60730-1 : 2011 - Automatic electrical controls for household and similar use - Part 1: General requirements

☐ Emission  EN61000-6-3: 2007; A1:2011; Generic standards for residential, commercial and light-industrial environments

☐ Immunity  EN61000-6-1: 2007; Generic standards for residential, commercial and light-industrial environments

UL Listed (CDN & US)  UL 61010-1 Safety Requirements For Electrical Equipment For Measurement, Control, And Laboratory Use - Part 1: General Requirements - Edition 2 - Revision Date 2008/10/28

FCC  This device complies with FCC rules part 15, subpart B, class B
Control, Automation and Connectivity Server (ECY-S1000)

Power Supply Input

Voltage .......................................................................................................... 18VDC
Power Consumption .................................................................................. 8.9W; external loads excluded

Communications

Ethernet Connection Speed .......................................................................... 10/100 Mbps
- Addressing ................................................................................................ IPv4 or Hostname
BACnet Profile ............................................................................................. BACnet Building Controller (B-BC)), AMEV AS-A and AS-B (pending)
BACnet Listing .............................................................................................. BTL, WSP B-BC
BACnet Interconnectivity ............................................................................ BBMD forwarding capabilities
BACnet Transport Layer ............................................................................. IP & MS/TP (optional)
Web Server Protocol .................................................................................. HTML5
Web Server Application Interface .............................................................. REST API

Supported BACnet MS/TP and Modbus RTU and TCP Connectivity:
- BACnet MS/TP or Modbus RTU ................................................................. 1 x RS-485 serial communications ports
  - Each RS-485 port supports one communication protocol at a time
- RS-485 Wiring .......................................................................................... 1-pair + Common/shield
- RS-485 EOL Resistor .............................................................................. Built-in
- RS-485 Baud Rates .................................................................................. 9600, 19 200, 38 400, or 76 800 bps
- RS-485 Addressing .................................................................................. Controller’s Web Configuration Interface
- Modbus TCP .............................................................................................. Devices must be on the same subnet

Supported Wireless Connectivity:
- Wireless Adapter .................................................................................. Optional, USB Port Connection
- Wi-Fi Communication Protocol ............................................................... IEEE 802.11b/g/n and 802.11s
- Wi-Fi Network Types ............................................................................. Client, Access Point, Hotspot

Supported Smart Room Control Components

Maximum number of standard devices supported per controller combined .......... 12
- Allure EC-Smart-Vue Series ..................................................................... 12
- Allure EC-Smart-Comfort Series ................................................................. 6
- Allure EC-Smart-Air Series ....................................................................... 6
- EC-Multi Sensor ....................................................................................... 4
- ECx-Light-4 / ECx-Light-4D / ECx-Light-DALI .............................................. 4
- ECx-Blind-4 / ECx-Blind-4LV ................................................................. 4

Maximum number of Bluetooth low energy devices per controller combined ....... 6
- Allure UNITOUCH ................................................................................... 2
- EC-Multi-Sensor-BLE ............................................................................. 4

A mixed architecture with standard room devices and Bluetooth low energy enabled devices is not recommended.

1. For more details about supported quantities, see the ECLYPSE Selection Tool.xlsm spreadsheet file available for download from SmartSource.
2. A controller can support a maximum of 2 Allure sensor models equipped with a CO₂ sensor. Any remaining connected sensors must be without a CO₂ sensor.
Hardware

Processor: Sitara ARM processor
CPU Speed: 1GHz
Memory: 4GB Non-volatile Flash (applications & storage) 512MB RAM

Real Time Clock (RTC): Real Time Clock with rechargeable battery
Supports SNTP network time synchronization
RTC Battery: 20 hours charge time, 20 days discharge time
Up to 500 charge / discharge cycles

Cryptographic Module: FIPS 140-2 Level 1 Compliant

Communications Ports:
- Ethernet: 2 switched RJ-45 Ethernet ports
  Supported Protocols: BACnet/IP, Modbus TCP, NTP, and REST
- USB Connections: 2 × USB 2.0 Ports
  1 × Micro-USB 2.0 Ports
- RS-485 Serial Communications: Screw terminals
  Supported Protocols: BACnet MS/TP or Modbus RTU
- Subnet: RJ-45

Status Indicators: Green LED: Power status, Subnet TX, RS-485 TX, and Ethernet Traffic
Orange LED: Controller status, Subnet RX, RS-485 RX, and Ethernet Speed

Mechanical

Dimensions (H × W × D): 4.74 × 3.57 × 2.31" (120.31 × 90.67 × 58.56mm)

Shipping weight: 0.85lbs (0.39kg)

Mounting: DIN rail or screw mounting

Enclosure Material: FR/ABS

Enclosure Rating: Plastic housing, UL94-V0 flammability rating
Plenum rating per UL1995

Environmental

Operating Temperature: 32 to 122°F (0 to 50°C)

Nema Rating: 1

Standards and Regulations

CE:
- Immunity: EN61000-6-1: 2007; Generic standards for residential, commercial and light-industrial environments

FCC
- This device complies with FCC rules part 15, subpart B, class B

UL Listed (CDN & US): UL916 Energy management equipment

I/O Modules - Universal Inputs (UI)

General
- Input Type: Universal; software configurable
- Current Input Option Selection: DIP switch
- Input Resolution: 16-bit analog to digital converter
- Power Supply Output: 18VDC; 20mA maximum per 0 to 20 mA input

Contact
- Type: Dry contact

Counter
- Type: Dry contact
- Maximum Frequency: 1Hz maximum,
- Minimum Duty Cycle: 500milliseconds On / 500milliseconds Off

0 to 10VDC
- Range: 0 to 10VDC (40kΩ input impedance)

0 to 5VDC
- Range: 0 to 5VDC (high input impedance)

0 to 20mA
- Range: 0 to 20mA
- 249Ω DIP-switch configurable internal resistor
Resistance/Thermistor
Range 0 to 350 KΩ
Supported Thermistor Types Any that operate in this range
Pre-configured Temperature Sensor Types:
☐ Thermistor 10KΩ Type 2, 3 (10KΩ @ 77ºF; 25ºC)
☐ Platinum Pt1000 (1KΩ @ 32ºF; 0ºC)
☐ Nickel RTD Ni1000 (1KΩ @ 32ºF; 0ºC)
                          RTD Ni1000 (1KΩ @ 69.8ºF; 21ºC)

I/O Modules - Digital Inputs (DI)
General
Input Type Dry contact or Open-Collector
Low Threshold < 2.5V
High Threshold > 3.0V
Pulse/Counter
Pulse Input S0 output compatible
Maximum Frequency 120Hz
Minimum Duty Cycle 4.167milliseconds On / 4.167milliseconds Off

I/O Modules - Universal Outputs (UO)
General
Output Type Universal; software configurable
Output Resolution 10-bit digital to analog Converter
Output Protection Built-in snubbing diode to protect against back-EMF, for example when used with a 12VDC relay
Load Resistance Minimum 200Ω for 0 to 10VDC and 0 to 12VDC outputs
                          Maximum 500Ω for 0 to 20mA output
Auto-reset Fuse 60mA @ 140ºF; 60ºC

0 or 12VDC (On/Off)
Range 0 or 12VDC

PWM
Range Adjustable period from 2 to 65seconds

Floating
Minimum Pulse On/Off Time 500milliseconds
Drive Time Period Adjustable

0 to 10VDC
Range 0 to 10VDC linear

0 to 20mA
Range 0 to 20mA
Current Source 20mA maximum per 0 to 20 mA output
Ports UO1, UO2, and UO3 only DIP switch

HOA
Hand-Off-Auto switch: When equipped
Supervision allows control logic to read the current HOA switch and potentiometer settings
Threshold Configurable
Potentiometer Voltage Range 0 to 12VDC

I/O Modules - Digital Output (DOT)
General
Output Type 24VAC Triac; software configurable
Maximum Current 0.5A continuous
1A @ 15% duty cycle for a 10 minute period
Power Source External power supply

0 or 24VAC (On/Off)
Range 0 or 24VAC

PWM
Range Adjustable period from 2 to 65seconds

Floating
Minimum Pulse On/Off Time 500milliseconds
Drive Time Period Adjustable

HOA
Hand-Off-Auto switch: When equipped
Supervision allows control logic to read the current HOA switch setting

I/O Modules - Digital Output (DOR)
For ECY-8DOR & ECY-8DOR-HOA Models:
General
Output Type Relay contact
Relay Type Form C
Power Source Dry contact (external power supply)
Operating Voltage 0 to 277VAC or 0-30VDC ±10%, see HIG for mounting specifications

Maximum Current
- Resistive Load 10A
- Inductive Load 6A
- Motor Load 3A

Protection Outputs must be protected with max 10 A external circuit breaker
Digital Range

HOA

Hand-Off-Auto switch

Supervision allows control logic to read the current HOA switch setting

Mechanical

Dimensions (H × W × D)

4.74 × 5.15 × 2.31" (120.31 × 130.07 × 58.56mm)

Shipping weight

0.75lbs (0.34kg)

Mounting

DIN rail or screw mounting

Hot-swappable

Yes (once high voltages have been removed)

Enclosure Material

FR/ABS

Enclosure Rating

Plastic housing, UL94-5VB flammability rating

Environmental

Operating Temperature

32 to 122°F (0 to 50°C)

Storage Temperature

-22 to 158°F (-30 to 70°C)

Relative Humidity

0 to 90% non-condensing

Altitude

<6562ft (2000m)

Pollution Degree

2

Ingress Protection Rating

IP20

(must be mounted in a protective enclosure to conform with electrical installation standards)

Overvoltage

Category II - 2.5 kV

Standards and Regulations

CE:

Electrical Safety

EN 60730-1 : 2011 - Automatic electrical controls for household and similar use - Part 1: General requirements

Emission

EN61000-6-3: 2007; A1:2011; Generic standards for residential, commercial and light-industrial environments

Immunity

EN61000-6-1: 2007; Generic standards for residential, commercial and light-industrial environments
UL Listed (CDN & US) — UL 61010-1 Safety Requirements For Electrical Equipment
For Measurement, Control, And Laboratory Use - Part 1:
General Requirements - Edition 2 - Revision Date 2008/10/28

FCC — This device complies with FCC rules part 15, subpart B, class B
