

INTRODUCING AFA CUMMINS®

ISL/QSL ENGINE PARTS & KITS

The Difference is in the Technology

AFA Industries now offers a full line of:

- * Cylinder Kits
- * Piston Kits
- * In-Frame Kits
- * Complete Overhaul Kits for ISL/QSL engine families

Kits include the **Induction hardened** cylinder liner that is factory specified for this application. Some others use non-hardened cylinders resulting in premature wear ultimately diminishing performance and shortening engine life. AFA pistons feature **high-strength forged steel crowns** to insure longer service life and are coated with a special **Manganese Phosphate coating** that reduces wear and improves break-in performance on initial start-up.

Also available are Cummins Valve train parts, Water and Oil pumps, Cooling System Components, Fuel System Components, and other engine parts to help you repair most components for the ISL/QSL engines.

AFA Q³ TECHNOLOGY
Quality Materials • Quality Engineering • Quality Manufacturing™

Consult your OE reference materials for exact applications.

Refer to the OEM service manual for proper engine assembly procedures.

Contact your local sales representative or AFA Certified Distributor for more information.
