

Update-Notes:

- Update of the Gracernote Database to Version 6502
- Upgrading and Updating of the Gracernote Database ID3Tag meta data

Requirements:

- USB stick of at least 4 GB data size.
Note: The USB stick must be formatted to FAT32 before use (right-click on the USB drive in the Win Explorer → choose "Format" → select FAT 32 → start).
- A Windows based PC or notebook to prepare the USB stick.

Installation of the software update:

1. Download the software update package „ZENEC_C9SL_C9FL_Gracernote_DB6502_Update.exe”.
2. The software package is a self-unzipping executable. Start extraction with a doubleclick and select your USB stick as target for the uncompressed files.
3. You obtain a folder called „C9D_SW_Update“ in the root directory of the USB stick.
4. Connect the USB stick to your Naviceiver.
5. Enter the Naviceiver setup. Tap on "Misc" → "Update" → Software "OK".
6. The Naviceiver will restart and show the Gracernote update-info dialog screen, including with the old and new Database Version.
7. Please check now the new DB-Version "New Version: "6502" and confirm it via pressing of "Yes" button, the naviceiver switching into the main update menu.
8. Make sure, checkbox „5. Gracernote“ is selected. If so, tap on the „Update“ button to start the update process.
9. Your system will be updated in a step-by-step process. The complete update procedure takes approx. 3 minutes. A status bar shows the update progress.
10. At the end the status will change from "Progressing" to "OK" and prompt "The system has been updated, please restart... ". Manually power OFF and ON.

Version checking:

After completion of the software/- database update, version checking is crucial to validate full success. If the installed version differs with listed version below, a full re-installation of the entire update is required.

Review of Gracernote Database version:

To check the version of Gracernote Database, enter the Naviceiver setup. Tap on "MISC" → "Info" → Show Info Gracernote "OK".

Database: 6502
Library: 5.6.2.9
