

**ANNOUNCING NEW CYLINDER HEAD KITS**

AFA Industries is pleased to announce the availability of three new Cylinder Head Component Kits for the Cummins® N14 & ISX engines, and Detroit Diesel® Series 60® engine families.

Part Number **AFA-ISXCHK**, is a Component kit for **all ISX engines** and includes the camshaft bushings. See the chart below for the contents of this kit.

Part Number **AFA-N14CHK**, is a Component kit for **N14 engines up to 6/1997**. See the chart below for the contents of this kit.

Part Number **AFA-S60CHK**, is a Component kit for **all 11.1L, 12.7L & 14.0L Series 60 engines with N2 type injectors**. See the chart below for the contents of this kit.

QTY	Description	AFA-N14CHK	AFA-S60CHK	AFA-ISXCHK
24	VALVE GUIDE	X	X	X
24	VALVE SPRING	X	X	X
48	VALVE KEEPER	X	X	X
6	FUEL INJECTOR SLEEVE	X	X	X
6	INJ SLEEVE SEAL	X	X	X
12	VALVE STEM SEAL	X	X	
14	CAMSHAFT BUSHINGS			X

Our kits include application engineered valve train components that are designed specifically for these engines. These particular engines operate in very high-heat conditions and AFA

engine parts are engineered to withstand the most grueling operating environments. All of the parts in these kits utilize application specific materials for superior durability. Some of the competition use non-application specific materials that will cause premature wear that will ultimately diminish performance and hours of use.

Also available from AFA are Cylinder Components, Engine Kits, Water and Oil pumps, Cooling System Components, Fuel System Components, and other engine parts to help you repair most components for all of the ISX, N14 and Series 60 engines. Contact your local sales representative or AFA Certified Distributor for more information.

**Total System Engineering** - In 1987, AFA Industries started manufacturing OE and Aftermarket sealing products. Since then we have expanded into a global engine parts manufacturer with an extensive system of quality control and inspection that is second to none in the industry. Our technology is always state of the art. Materials used in our parts are always OE quality or better.

Our manufacturing methods are constantly monitored for consistency and efficiency. The results are products that will meet or exceed the expected life cycle of any heavy duty diesel engine in any application - guaranteed.
