QUILTING BY PAT BARRY

## ENJOY MORE TIME QUILTING

# Statler by Gammill®

## Spend More Time Quilting

Our long-lasting, dependable, quality machines allow you to enjoy more time quilting. The Statler by Gammill® utilizes cutting-edge computer software and robust hardware to beautifully stitch any design. The Statler® can handle an intricately patterned king-size quilt in a matter of hours instead of days. Available with a 22, 26, 30 or 36-inch Gammill-quality machine head, a Statler® gives you the flexibility of hands-free quilting. With exceptional features, the latest in quilting innovations, lifetime mechanical warranty, free software upgrades, and unparalleled customer service, it is easy to see why Statler by Gammill® is the choice of experienced quilters everywhere.

### SYSTEM INCLUDES

- Gammill® longarm quilting machine
- Computer and monitor
- Statler CreativeStudio® software
- More than 1,000 digitized patterns, including 370 designer patterns
- Sturdy all-steel table
- LED light fixture with black light
- Servo System, which drives the sewing head with speed, accuracy, and precision
- Multifunctional keypad
- Toll-free technical support
- Lifetime mechanical warranty against defective materials and/or workmanship, three-year electrical parts warranty, and two-year in-shop labor warranty

## Endless Possibilities

- Design your own patterns with the same tools professional designers use
- Create layouts and view them on screen before you stitch
- Customize designs by stretching, rotating, moving, dividing, flipping, copying, and re-shaping patterns
- Customize a pattern for a whole quilt or each block
- Automatically fit patterns to any shaped block or boundary, or customize patterns to fit any shape block, making irregular piecing look good
- Use drawing capabilities to express your creativity
- Run your machine freehand and record patterns for future use
- Echo around any pattern to create depth
- Place designs in a circular pattern with Circular Array
- Quilt around the appliqué, not over it with the trim feature for blocks and pantographs
- Let the computer automatically design an edge-to-edge quilt by calculating rows and spacing
- Use automated features to easily “stitch-in-the ditch”
- Set border and corner patterns to sew continuously
- Sew without tie offs around or inside your appliqué
- Load any image into the software
- Flow patterns along any shape by using Apply Pattern
- Use Nodes to make each pattern completely elastic

-----  
FREE future  
software upgrades  
-----

The Statler by Gammill® includes the user-friendly software program CreativeStudio® with free software updates.

-----  
A Lifetime  
Warranty for a  
machine that will  
last a lifetime.  
-----

All new Gammill® machines come with a lifetime mechanical warranty against defective materials and/or workmanship, three-year computer warranty, three-year electrical parts warranty, and two-year in-shop labor warranty. The Gammill® warranty also covers commercial use of machines.
