# Lightning Cutter

In Australia, the South Pacific, East Asia and Europe, Lightning Cutters are known and valued as top quality long lasting cutting machines that go forever and do not let you down. Quality parts and built-in features of high manoeuvrability guarantee you a machine that will perform and perform. And when you do need parts and service, Lightning can supply. Choose the best when only the best will do!

## LIGHTNING CUTTING MACHINES

At Lightning we are fanatical about quality. All Lightning Cutters have their wearing parts made from hardened and ground steel for extra long life. When oiled as instructed Lightning Cutters run for years and years with no other maintenance required.

Lightning Cutters are easy to handle and manoeuvrable. There is a machine for your requirements whether you are cutting the finest lingerie or the heaviest canvas. Just choose the options that suit your application.

## 20 YEAR GUARANTEE ON LIGHTNING MOTORS

Our repulsion induction motors will not burn out. Only Lightning Cutters have this unique robust motor which guarantees you no downtime or expensive rewiring.

## THE COMPANY

Lightning International Pty Ltd has been supplying the Australian apparel industry for 50 years and exporting to Asia and Europe for 20 years. Our long term experience guarantees we are well placed to meet your needs with machines and spare parts. The performance of our high quality product has eliminated 95% of competition in Australia.

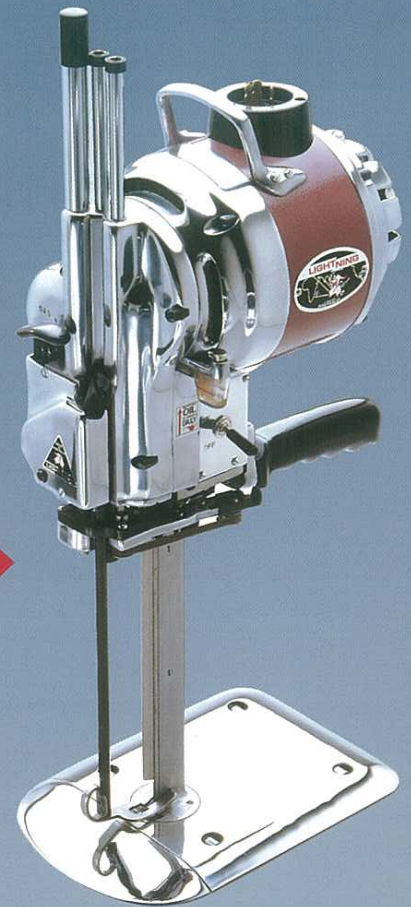

Now we are integrating with the Wolf Machine Company U.S.A. to bring this unique high quality cutting machine to the world market.

# LIGHTNING

## POWERMATIC

This machine has the robust repulsion induction motor and has the capacity to work around the clock without loss of power or overheating. It is a very versatile machine designed to cut heavy materials such as canvas, heavy cottons, denims, linings and supported plastics but can also cut the finest fabrics and flimsiest lingerie. It is available in **4 inch, 6 inch, 8 inch, 10 inch, 12 inch and 14 inch.**

**Options:** When required for heavy work the machine can be fitted with a wide base, a longer stroke and a lowered handle. The choice of a round handle or pistol grip is also possible.

## LIGHTOMATIC

This machine is the only cutter in the world that has a low weight to power ratio that makes it very light to handle whilst still being a strong machine. It has the reliable repulsion induction motor and is quiet and easy to handle. An excellent machine for female operators, it is beautifully manoeuvrable for cutting lighter fabrics and fine work. Fitted with an extra narrow standard it is designed to handle all but the heaviest of materials. It is suitable for cutting cottons, woollens, lingerie and quiltings and is available in **4 inch, 6 inch, 8 inch, 10 inch, 12 inch and 14 inch.**

**Options:** Customers can choose between having a round handle or pistol grip. We recommend 1 5/8" long stroke on 14 inch machines.

## PLASTAMATIC

If you are cutting clear and unsupported plastic with a thickness in the range of .002 inch to .012 inch this is the model machine to choose. It features a special low speed motor enabling it to cut plastic without fusing. If required the cutter can be equipped with a most effective lubricating device. We recommend the machine be equipped with a standard stroke and lowered handle. When making enquiries a sample should be submitted.

It is available in **4 inch, 6 inch and 8 inch** and there is the choice of a round handle or pistol grip.

## POWERGLIDE

The distinctive gold motor casing distinguishes this top of the range cutter! The Powerglide is fitted with an extra powerful repulsion induction motor and is designed to cut the heaviest of fabrics (denims) with minimum effort and operator fatigue. Standard features of this machine are the longer extra powerful motor, a long stroke and lowered handle. The balanced design eliminates toppling. Extra stability is provided by the wide, rear centre mounted base. It is available in **6 inch, 8 inch, 10 inch and 12 inch**.

**Options:** There is a choice of round handle or pistol grip.

**20 YEAR GUARANTEE ON  
REPULSION INDUCTION MOTORS  
IN STRAIGHT KNIFE CUTTERS.**

## OCTO 4

This cutter has a eight sided blade and is designed to cut fusible materials which if cut with a perfect circle machine, tend to draw the fabric into the blade. This machine is most suitable for cutting plastic, rubber, unsupported plastic, foam, paper, Vylene and Vynex (with a limit of 10 layers). It can also cut any woollen, cotton and synthetic fabrics, except knitwear.

**THIS OCTO MACHINE HAS  
A 12 MONTH WARRANTY.**
