

DCP-2300

Automatic 2-needle lock stitch tape attaching machine

Equipped with high speed 2-needle lock stitch machine with needle feed and intermittent puller feed for efficient and pucker free tape attaching.

Fitted with large size, double capacity hooks to increase machine output by cutting down machine stops to replace bobbins.

Sewing head available in many needle gauges from 3 to 38 mm (with thread cutter) and needle gauges 50, 55, 65 and 68 mm without thread trimmer.

Fully automatic, computer controlled sewing cycle with reverse stitches at the start and stop of the sewing operation.

Compact, slim type, space saving frame with fully synchronized, 550 cm long, conveyor belt simplifies the handling of large and heavy curtains.
