Finish them the simple way with..*

TEXSEW PRO CONVEYORLINE

A super versatile solution to complete a variety of finishes including...

- * Hem
- * Velcro attaching
- * Silicone/Latex strip attaching
- * Reinforcement tape attaching

The Texsew Pro system built in the U.K. by Solent Sewing incorporates a high quality twin needle lockstitch sewing machine head featuring automatic material edge sensing, automatic back stitch and thread trimming complete with synchronized conveyor for

stable and consistent material feeding, tape dispensers and quick change fabric guides for various seam type stitching. The machine can be used as single needle or twin depending on the operation and a range of optional devices are available to enhance the solution. Simply the highest quality SEG system available.
