

With EnvisionWare's OneStop™ software, your patrons enjoy the ease of use they've come to expect with a self-checkout system, combined with the flexibility, efficiency and integration you need to keep your library running smoothly.

### Customisable and Intuitive

OneStop is customisable and designed to work with EnvisionWare's hardware or your existing hardware, making it a cost effective and flexible solution.

- Works out of the box to provide a complete circulation system
- Use with your hardware or integrate with an array of EnvisionWare hardware platforms for a turnkey, self-service solution
- Customise your workflow to fit special needs
- Included API facilitates creation of a fully customised patron experience or a custom circulation application
- Dynamic language selection (English, French, Spanish, Polish and Traditional, Simplified and Hong Kong Chinese)

### Cost Effective and Efficient

OneStop integrates with EnvisionWare's full suite of self-service solutions for time and print management, fine payment and more, saving on hardware costs and space and providing a single interface for patron self-service.

- Integrate with EnvisionWare's PC Reservation® and LPT:One™ for computer sign-up and print release
- Integrate with EnvisionWare® eCommerce Services™ for fine payment
- Add EnvisionWare® Branch Manager™ for email receipts, staff alerts and help requests
- Plug-in media control through EnvisionWare® Media Case Controller (EMC2)™ for RFID-ready media collections
- Remotely view, control and update all stations from a central console or staff station (optional)
- Compatible with barcodes and RFID technology
